THE FACULTY

1958-1959

JOHN ADRIANI, A.B., M.D.,
Professor of General Anesthesia

CHRISTIAN A. ALLENBURGER, JR., D.D.S.,
Instructor in Orthodontics

JOHN G. ARNOLD, JR., B.A., M.A., Ph.D.,
Consultant in Biological Sciences

ANTHONY B. CARIMI, D.D.S.,
Instructor in Dental Anatomy

ROSA IUSEM CARVEL, B.S., D.D.S., Ph.D.,
Associate Professor of Oral Medicine

THOMAS E. CLEMENTS, M.D., F.A.C.S.,
Professor Emeritus of Anatomy

PAUL COOK, A.B., D.D.S., M.P.H.,
Chief, Section of Dental Health, La. State Dept. of Health
Lecturer in Public Health Dentistry

ALLEN A. COPPING, D.D.S.,
Instructor in Dental Anatomy

EDWARD J. DERBES, JR., D.D.S.,
Lecturer in Dental Economics and Practice Management

JOHN H. DONALDSON, B.S., D.D.S.,
Associate Professor of Oral Diagnosis
and Roentgenology

TIMOTHY L. DUGGAN, B.S., M.S.,
Associate Professor of Bacteriology, Histology and Physiology

ROBERT F. EASTMAN, D.D.S., F.A.C.D.,
Professor of Operative Dentistry

EMILE H. ECUYER, D.D.S.,
Instructor in Oral Medicine

EDWARD A. GAMARD, D.D.S., F.A.C.D.,
Professor Emeritus of Operative Dentistry

W. ORMOND GOGGIN, D.D.S., F.A.C.D., F.I.C.D.,
Associate Professor Emeritus of Oral Medicine

NORMAN F. GUENO, D.D.S.,
*Associate Professor Emeritus of
Crown and Bridge Prosthesis*

MARION A. GUIDRY, B.S., M.S., Ph.D.,
Assistant Professor of Biochemistry

WALTER A. HALL, JR., B.S., D.D.S., M.S., F.A.C.D.
*Professor of Prosthodontics
Visiting Dental Surgeon,
Loyola University Unit, Charity Hospital*

VICTOR HALPERIN, A.B., B.S., D.D.S.,
*Associate Professor of Pathology
Visiting Dental Surgeon,
Loyola University Unit, Charity Hospital*

FRANK L. HERBERT, D.D.S.,
*Assistant Visiting Dental Surgeon,
Loyola University Unit, Charity Hospital*

BERNARD C. HOLLIER, D.D.S.
Instructor in Pathology

FRANK J. HOUGHTON, D.D.S., F.A.C.D., F.I.C.D.,
*Dean
Senior Visiting Dental Surgeon,
Chief, Loyola University Unit, Charity Hospital*

CLAY HUNLEY, D.D.S.,
Instructor in Pathology

EDWARD J. IRELAND, A.B., M.S., Ph.D.,
Professor of Pharmacology

DARRELL I. JOBE, D.D.S.,
*Assistant Professor of Operative Dentistry
and Dental Materials*

REV. HOMER R. JOLLEY, B.A., M.A., M.S., S.T.L., Ph.D.,
Chairman of the Department of Chemistry

JAMES KIM, D.D.S.,
Assistant Professor of Oral Surgery
Visiting Dental Surgeon, Charity Hospital

JOSEPH M. LAGO, B.S., D.D.S.,
Instructor in Crown and Bridge Prosthesis

VICTOR J. MATUKAS, D.D.S.,
Instructor in Anatomy

EDMOND L. MERILH, B.S., M.S.,
Professor Emeritus of Histology

REV. JOHN H. MULLAHY, S.J., A.B., M.S., S.T.L., Ph.D.,
Chairman of the Department of Biological Sciences

JAMES C. MURPHY, LL.B.,
Lecturer in Dental Jurisprudence

CHARLES J. O'SHELL, D.D.S.,
Assistant Professor of Operative Dentistry

DOUGLAS B. PARKER, M.D., D.D.S., F.A.C.D.,
Professor of Oral Surgery
Senior Visiting Dental Surgeon,
Loyola University Unit, Charity Hospital

DONALD L. PETERSON, D.D.S.,
Senior Visiting Dental Surgeon
Loyola University Unit, Charity Hospital

HAROLD W. PETERSON, D.D.S., M.S.D.,
Senior Visiting Dental Surgeon,
Loyola University Unit, Charity Hospital

JOHN R. PINION, D.D.S.,
Associate Professor of
Crown and Bridge Prosthesis

JAMES H. QUINN, D.D.S.,
Visiting Dental Surgeon,
Loyola University Unit, Charity Hospital

KENNETH N. RAYER, M.D.,
Professor of Anatomy

ROBERT A. ROBINSON, B.S., M.D., F.A.C.S.,
Professor of Physical Diagnosis and Principles of Medicine

JOHN M. SARTIN, D.D.S.,
Instructor in Prosthodontics
Assistant Visiting Dental Surgeon,
Loyola University Unit, Charity Hospital

PRESCOTT E. SMITH, D.D.S., F.A.C.D.,
Associate Professor of Orthodontics
Visiting Dental Surgeon
Loyola University Unit, Charity Hospital

FRED R. TEGTMEIER, D.D.S.,
Instructor in Crown and Bridge Prosthesis

SIDNEY L. TIBLIER, A.B., M.S., D.D.S., F.A.C.D.,
Professor of Ethics and Dental History
Senior Visiting Dental Surgeon,
Loyola University Unit, Charity Hospital

THOMAS J. TIBLIER, D.D.S.,
Visiting Dental Surgeon
Loyola University Unit, Charity Hospital

ROBERT B. TOWILL, D.D.S.,
Professor of Oral Pediatrics

ANDREW R. TOWNES, B.S., D.D.S.,
Instructor in Operative Dentistry

HUMBERTO VALLADARES, D.D.S.,
Instructor in Prosthodontics

RICHARD A. WALLE, D.D.S.,
Instructor in Orthodontics

ASSISTING STAFF

ELIZABETH ANN ARMSTRONG, B.S. in M.T.,
Medical Technologist

MARIE COPPING,
Clerk in Operative Clinic

MAXWELL B. DAVIES,
Dental Technician

MARY LYNNE FONSECA
Office Assistant

ROSE GRAFFAGNINO
*Assistant in Surgery
and Periodontia Clinics*

ELDA H. HEINY,
Central Supply Clerk

EUNICE KENNEDY
P B X Operator

STELLA LE BOEUF,
Clinic Clerk and Cashier

OPLÉ MABERRY
Clerk in Clinic Record Office

EVELYN McKINLEY
Clerk in Diagnostic Clinic

JANICE M. NEYREY,
Clerk in Prosthodontics Clinic

MARY CLAIRE OHLMEYER,
Record and Receiving Clerk

FRIEDA G. ROSS
Secretary

THE SCHOOL AND ITS FACILITIES

Organization In the spring of 1914 the Board of Directors of Loyola University invited Dr. C. V. Vignes to begin the organization of a faculty for a School of Dentistry. Dr. Vignes became the first dean of the new school which enrolled its first students in September, 1914. The School of Dentistry is an integral part of the University, organized under its general Charter and governed by its Board of Directors.

Rating of the University Loyola University is accredited by the Southern Association of Colleges and Secondary Schools and the National Catholic Educational Association, and holds membership in the Jesuit Educational Association, the Association of American Colleges, American Association of Colleges for Teacher Education, and is accredited by National Council for Accreditation of Teacher Education.

The School of Dentistry is on the list of approved dental schools of the Council on Dental Education of the American Dental Association. It is a member of the American Association of Dental Schools, and complies with the recommendations of this Association.

Objectives At all times and in all activities the School seeks to maintain the highest possible standards.

The educational program directs and assists the student in fitting himself for the general practice of his profession in all the biological, technical and social aspects of oral health service, and encourages him in developing habits of study and inquiry. Solid content in courses, strict standards of scholarship, and sound methods of teaching guide the student in his acquisition of initiative and self-reliance in extending his knowledge and developing his skill.

Location The University is situated in one of the best residential sections of New Orleans, at 6363 St. Charles Avenue, opposite Audubon Park. The School of Dentistry, occupying Bobet Hall, is located on the campus.

Student Housing The University maintains a limited number of rooming houses for the convenience of male students wishing to use these facilities. Names and locations of inspected and approved rooming houses will be furnished by the Dean of Students.

Equipment The School is well equipped. Particular care has been taken to make the laboratories and clinics adequate and modern. The technical laboratories are large, bright and airy. Each student has an individual laboratory desk with gas, compressed air, and electrical connections. Furnaces, dental engines, polishing motors, casting machines and electrical ovens are available. All other laboratories are well planned and equipped.

The Dental School Clinics, well lighted and ventilated, are equipped throughout with standard operative units and chairs and sterilizers. The number of patients and variety of work amply insure each student sufficient experience to make him proficient in clinical work before graduation.

Hospital Facilities Exceptional facilities for acquiring actual experience in hospital practice and methods are available and are utilized by the students of dentistry.

In the Louisiana State Charity Hospital, students observe hospital practice in diagnosis, ward rounds, anesthesia, and surgery. The morning outpatient dental surgery clinic is staffed by students under the supervision of their teachers.

Members of the senior and junior classes attend clinics in surgery at the Louisiana State Charity Hospital under some of the foremost surgeons in the South. They are instructed in making diagnoses and witness the subsequent operations. They observe the administration of various forms of anesthetics and learn the importance of aseptic precautions.

Library The Library of the Dental School is an integral part of the large \$800,000 University Library, situated adjacent to the Dental School and easily accessible to the students.

Student Loans The University in conjunction with a local bank provides a loan service for students to defray the costs of tuition and fees.

In addition the following loans are available to dental students:

The Woman's Auxiliary of the Louisiana Dental Association Loan Fund available to senior and junior students of the State of Louisiana.

The American Dental Trade Association Loan Fund and the Higgins Loan Fund available to senior students only.

The Kellogg Loan Fund.

All applications for Student Loans must be submitted to the Chaplain of the School of Dentistry at least one month before registration day of the semester for which the loan is requested.

University Chaplain The University appoints a Priest, together with needed assistants, to the post of University Chaplain for all of the students. He is at their disposition at all times to guide, counsel and advise. The students will find him ready to assist them in their spiritual, personal and individual problems. He is also, in general, responsible for all of the organized spiritual activities on the campus.

Student Council This Council consists of twenty-seven members, representing the College of Arts and Sciences, the Schools of Dentistry and Law, and the Colleges of Pharmacy, Music, and Business Administration. These students are selected by the student body with the approval of the faculty. The duty of the Council is to unify student thought and action. It conducts general meetings and elections, sponsors and manages interclass contests, contributes to the student publications, and leads and directs student activities.

Medical Service Loyola University maintains a medical service on the campus. This service insures a safe health program for both students and faculty.

Organizations Students in the School of Dentistry are eligible to membership in various scholastic, religious, cultural, and athletic organizations of the University including the several dental societies and fraternities.

The C. Victor Vignes Odontological Society This is an undergraduate honor society open to Seniors, Juniors and Sophomores and named for the late Dean Emeritus C. V. Vignes, the first dean of the School, distinguished for his service to organized dentistry and dental education. Scholarship above the average and ambition to excel are required for membership, to which a student is elected by the members of the Society with the approval of the Dean. Its purpose is "to further the interest and knowledge of its members in the science of dentistry." Scientific papers, table clinics and demonstrations by the members of the Society, by the Faculty, Alumni, and other guests form the programs of the meetings.

Junior A.D.A. To stimulate the students to appreciate and to participate in the activities of organized dentistry, and to fit them in some degree to do so, the entire student body is required to hold Junior membership in the American Dental Association and to take active part in its work.

Dental Fraternities Further to inspire the student with high professional ideals both during his school days and in after life, chapters of the various national dental fraternities are maintained. There is the Delta Omega Chapter of the Psi Omega; the Alpha Chi Chapter of Xi Psi Phi; the Zeta Zeta Chapter of Delta Sigma Delta.

Omicron Kappa Upsilon This is a national honor fraternity for graduates. Seniors are elected to it by the faculty members of the Society. Not more than twelve per cent of a graduating class may be elected, and then only on a basis of superior scholarship, character, and conduct. Presentation of the key takes place at the last convocation of the year.

The Alumni Association This organization, having for its purpose to keep alive within its members the spirit of study and to assist the School, holds meetings periodically, one of which is the annual reunion.

ADMISSION AND REGISTRATION

The Pre-Dental Course

The minimum basis for admission to the School of Dentistry is the successful completion of two full academic years of work in an accredited college of liberal arts and sciences. The pre-dental course must include at least a year's credit in English, in biology, in physics, and in inorganic chemistry, and a half year's credit in organic chemistry. All courses in science should include both class and laboratory instruction. Formal credit in biology and physics, but not in English and chemistry, may be waived in the case of exceptional students who have three years of college credit or in the case of those holding a bachelor's or other degree from an accredited college.

The pre-dental course is offered at Loyola in the College of Arts and Sciences.

No applicant will be considered for admission to the Loyola University School of Dentistry unless the official record of all his pre-dental college work indicates a general average of C or better.

All applicants are required to take an aptitude test given under the jurisdiction of the Council on Dental Education of the American Dental Association.

Combined B.S. and D.D.S. Degrees Owing to the advance in college preparation required for admission to the dental course, it now becomes feasible for the candidate for a D.D.S. degree to receive also a B.S. degree without much additional time being spent in the College of Arts and Sciences.

Accordingly, it is strongly recommended that students preparing to enter the School of Dentistry discuss this matter with their Deans, and ascertain the precise requirements in their colleges. In many instances it will be found that by attending summer courses, in addition to the pre-dental course of two years, they will be eligible to receive a B.S. degree prior to their receiving the D.D.S. degree. In the case of those students who have made three years of the course leading to the B.S. degree, there should ordinarily be no difficulty about receiving this degree during their dental course.

Application for Admission Applicants for admission to the School of Dentistry are advised to make their applications early and in writing, preferably on completion of the

first semester of pre-dental work. Application forms for this purpose may be secured from the Office of the Registrar, Loyola University School of Dentistry, and the completed form accompanied by a photograph and \$10.00 to cover the evaluation fee should be returned to the same address. Applicants must request the Registrar of each college or university which they have attended to send directly to the Registrar of Loyola University School of Dentistry an official transcript of all of their college work. Interviews of the applicants by the Committee on Admission are required.

The decision as to whether an applicant possesses the qualifications required in a student of Loyola University School of Dentistry rests entirely with the Committee on Admission.

The Dental School is open to women who have the proper credentials.

Registration First semester registration will take place on the Wednesday and Friday preceding the date of opening of classes. Freshman students will register on the Wednesday of the registration week. Second semester registration will take place on the first Monday of the second semester. The procedure is:

1. Fill out the registration cards which are obtained in the Registrar's office in the School of Dentistry (Room 206, Bobet Hall).
2. Report to the Finance office (Marquette Hall), with one copy of the registration card, pay tuition and fees and obtain an Admit Card.
3. Return the Admit Card to the Registrar of the School of Dentistry and obtain a list of books and instruments, locker and laboratory desk assignments, and a schedule of classes.

Students must complete their registration and obtain the required equipment and books prior to the opening of classes.

Basis of Computation A student's expenses in the school of dentistry may be classed under the following headings: Fees, Books, Instruments and Supplies.

Fees The basic fee payable to the University on registration each semester includes registration, tuition, laboratory, library, subscription to the Maroon and the Wolf, athletics, lecture forum, physical education, and certain other student activities. The basic fee is \$350.00 each semester for all Louisiana students and for all out-of-state students who have already completed the sophomore and freshman years. The basic fee for all other out-of-state students is \$475.00 for each semester of the course. Beginning September, 1961 the basic fee for out-of-state students in all classes will be \$475.00 for each semester of the course.

The breakage deposit of \$5.00 is required of each student from which charges for loss or breakage are to be deducted and the balance refunded to the student.

A late registration fee of \$5.00 is required of each student who fails to register during the regular registration period.

A cap and gown deposit of \$30.00 is required of each candidate for graduation. This deposit must be made not later than May 1st, and will be refunded upon the return of the cap and gown after graduation.

Refunds upon withdrawal. It is the sole duty of the individual student, in case of interruption of courses, to make formal application to the Registrar's office for refunds which will be made as follows:

Within the first week of a semester.....80 per cent

One week to three weeks of a semester.....60 per cent

Three weeks to five weeks of a semester.....40 per cent

No refunds after five weeks.

The \$100.00 paid upon acceptance is not refundable.

No refunds are made when a student is suspended, dismissed for disciplinary reasons, or fails to pass.

Books The list of required books will be furnished on registration. These books must be purchased new by the student at the University Bookstore or elsewhere at his choice.

Instruments and Supplies Detailed instrument and supply lists will be furnished on request. All such equipment must be new and must be in the student's possession by the time classes open for the school year.

Summary of Expenses The following table shows the approximate costs of each semester of the dental course.

FRESHMAN YEAR, 1959-1960

	1st. Sem.	2nd. Sem.
Tuition and Fees:		
Louisiana Students	\$350.00	\$350.00
Out-of-State Students	475.00	475.00
Books (approximately)	90.00	20.00
Instruments and Supplies (approximately)	415.00	
(Plus additional expendable supplies as needed)		

SOPHOMORE YEAR, 1959-1960

Tuition and Fees:		
Louisiana Students	\$350.00	\$350.00
Out-of-State Students	475.00	475.00
Books (approximately)	95.00	15.00
Instruments and Supplies (approximately)	750.00	
(Plus additional expendable supplies as needed)		

JUNIOR YEAR, 1959-1960

Tuition and fees	\$350.00	\$350.00
Books (approximately)	50.00	
Instruments and Supplies (approximately)	430.00	
(Plus additional expendable supplies as needed)		

SENIOR YEAR, 1959-1960

Tuition and fees	\$350.00	\$350.00
Books (approximately)	30.00	
Supplies (approximately)	60.00	
(Plus additional expendable supplies as needed)		

PROMOTION AND GRADUATION

Attendance Regular and punctual attendance at all classes and laboratory exercises is required. Unexcused absences will be deemed sufficient reason for dismissal, or for the withholding of credits for the year's work.

To be eligible for examination in a subject a student is required to have a minimum attendance record of 85 per cent in that subject.

If absences caused by personal illness reduce a student's attendance record to not less than 75 per cent, a student may be permitted, with the approval of the instructor of the course and the Dean, to do a sufficient amount of make-up work to meet the required minimum.

A double absence will be recorded for each absence on the two days immediately preceding and the two days immediately following a scheduled vacation.

All classes will meet at the time shown on the schedule. A student may not be admitted after instruction has begun.

The attendance record will be made at the beginning of all scheduled periods and at any intervals thereafter at the discretion of the class instructor.

Tardiness of more than ten minutes will be counted as an absence. Two tardy marks are counted as one absence.

Examinations and Grades Each instructor who is in charge of a course will prepare and conduct written or oral examinations frequently throughout each semester of a course. The nature and extent of this work must afford a sound basis for evaluating the student's achievement throughout the course. It is the responsibility of the course instructor to properly inform students of the progress during the semester.

A student's scholarship grades will be reported by the course instructor to the office of the Dean at mid-semester and at end of semester.

Official semester grades are expressed in letters. A corresponds to a grade of 100 to 93 in a 100-point scale, B to a grade of 92 to 85, C to a grade of 84 to 77, D to a grade of 76 to 70, E to a grade of 69 to 63, F to a grade of 62 to 0. The lowest passing mark is D.

The mark I (incomplete) may be used for those instances in which an otherwise satisfactory student has been unable to complete some portion of his required work because of unexpected and excusable circumstances. This mark may be given only when the amount of uncompleted work is relatively small and can be completed within a reasonable period of time. The mark E (condition) requires a student to pass a new examination or show a certain degree of proficiency in a specified study as a condition of remaining in the class or institution. Both the mark E and I automatically become F (failed) if the student does not remove the deficiencies indicated by these grades.

No grade higher than D will be given for any examination taken out of the regular time for any reason. For every such examination, there is a charge of \$2.00, payable to the Registrar of the School of Dentistry.

Promotion A candidate for promotion must present not only the required character and quantity of work but he must attain at least a certain minimum quality in his work.

A student will not be promoted while any failure or any condition, or any incomplete course is charged against him.

If a student receives three conditions at the end of the session, he must withdraw from the School, but, at the discretion of the Committee on Admission, he may be readmitted the following year for a repetition of the entire year in every subject.

If permitted by special action of the Committee on Admission to repeat a year, the student must repeat all the subjects of that year and maintain an average quality point ratio of at least 1.00. If in a repetition he fails to attain that average he must withdraw from the School and may not again be admitted. No student will be allowed to repeat more than one year of the course or to repeat a class more than once.

Discipline The educational system of the University stresses the development of Christian character and gentlemanly behavior at all times and in all places.

The school reserves the right to terminate its connection with any student who does not give sufficient promise of attaining that degree of scholarship and technique required in a Doctor of Dental Surgery, or who lacks those qualities

which enter into the fine character required in a worthy member of the dental profession, or whose conduct in or out of the School is objectionable. The final decision in this matter rests with the Executive Committee of the Faculty and/or the Board of Directors. The fees of such a student will not be returned.

The School is not responsible for the loss of any personal property belonging to any of its students, whether the loss occurs by theft, fire, or an unknown cause.

Requirements On recommendation of the Faculty, the degree of Doctor of Dental Surgery (D.D.S.) will be conferred on those candidates who have complied with the following requirements: (1) The candidate must have given evidence of good moral character and ethical ideals; (2) he must have completed with due quality all courses and examinations prescribed; (3) he must have paid all indebtedness to the School; and (4) he must be at least twenty-one years of age.

Graduation Honors In accordance with the general policy of the University to honor those students who complete their courses with distinction, a student who has made an average of 2.5 graduates *cum laude*; one who has made an average of 2.7, *magna cum laude*; one who has made an average of 2.9, *summa cum laude*.

DESCRIPTION OF COURSES

OPERATIVE DENTISTRY

Dr. Eastman Dr. O'Shell Dr. Townes Dr. Jobe

Course I A lecture and laboratory course in the fundamental principles and technic of this subject. It is given in sophomore year.

Course II A lecture course throughout junior year dealing with the clinical phases of the subject.

Course III Discussions and demonstrations of operative problems and variations in technics.

DENTAL ANATOMY

Dr. Copping

Dr. Carimi

A lecture and laboratory course covering in detail the structure, development, characteristics, arrangement, and function of all teeth in the oral cavity, with systematic nomenclature. A careful study is made of the surfaces, ridges, fossae, pulp chambers and pulp canals of the teeth, proper contact of approximate teeth, normal occlusion and the relation of the teeth to their supporting tissues.

PROSTHODONTICS

Dr. Hall

Dr. Pinion

Dr. Valladares

Dr. Lago

Dr. Sartin

Complete Denture Prosthesis Course I A lecture and laboratory course in the principles and technic of complete denture construction. It is given in the freshman year.

Course II A lecture and laboratory course in Removable Partial Denture Construction. The various types of Removable Partial Dentures are explained, designed and constructed by the sophomore student. This course prepares the sophomore to adequately fabricate the technical aspect of clinical Removable Partial Denture treatment during his junior and senior clinical years.

Course III Lectures in this course in junior year cover the physiological, anatomical, and operative phases which influ-

ence complete practical denture construction of every type. Original cases are also cited and the special technics involved are explained in detail. Instructions on esthetics are given to students for a better understanding of the construction of complete dentures that will harmonize with the facial cosmetics of the individual case.

Course IV Lectures in senior year continue the Complete Denture theory through the first semester. The second semester concerns Removable Partial Denture theory and clinical applications.

Crown and Bridge Course I A lecture and laboratory **Prosthesis** course in the fundamental principles and technic of crown and bridge prosthesis. It is given in sophomore year.

Course II A lecture and laboratory course given throughout the junior year covering all phases in the clinical application of crown and bridge technic.

Course III This course given in the senior year consists of lectures and demonstrations of problems and the various technics of crown and bridge.

DENTAL MATERIALS

Dr. Jobe

A course in the chemical and physical properties of the materials used in dentistry and in the fundamental processes of their use.

CLINICAL DENTISTRY

Dr. Houghton	Dr. Eastman	Dr. Hall	Dr. Towill
Dr. Parker	Dr. Smith	Dr. Jobe	
Dr. Pinion	Dr. O'Shell	Dr. Donaldson	Dr. Carvel
Dr. Allenburger		Dr. Walle	
Dr. Ecuyer	Dr. Kim	Dr. Lago	Dr. Valladares

The principles of operative dentistry and prosthodontics are applied by the students in their junior and senior years in the dental clinic under the direct supervision of the instruc-

tors. Each student has opportunity to utilize his knowledge and skill acquired in operative and prosthodontic technics in making actual restorations for the patients.

Special clinic practice in periodontia, endodontia, and orthodontia is given under the direction of the instructors in clinics conducted each day.

Special opportunities in oral surgery are offered in the surgery clinic of the University, and the outpatient clinic of the Charity Hospital, where students perform the dental surgical operations under the direct supervision of the instructors.

Summer Clinics Clinic and hospital service continue throughout the year except for the month of August, thereby affording members of the junior and senior classes an opportunity to secure additional clinical experience in all departments.

ORTHODONTICS

Dr. Smith

Dr. Walle

Dr. Allenburger

Course I In sophomore year the preclinical course is given dealing in class and laboratory with occlusion and malocclusion, the taking of impressions and making of casts, pouring and correct trimming of models, constructing molar and incisor bands with various forms of soldered attachments, constructing a lingual arch with auxiliary springs, and a labial appliance with bracket bands, in addition to various freehand soldering operations.

Course II This course is given in junior year and consists chiefly in a study of the conditions and factors to be examined in the patient, the indications and contraindications for orthodontic treatment, the planning and handling of the treatment. The principles thus taught are applied in clinic practice, each student under close supervision carrying out the treatment of at least two cases.

Course III The studies of the previous course are carried forward in senior year to include such topics as the relation of tissue and organs under treatment, preventive orthodontic service and the like. The importance of realizing one's limitations in the matter of difficult cases is emphasized. Cases under treatment in the clinic are discussed.

PATHOLOGY

Dr. Halperin

Dr. Hunley

General This course in the sophomore year is designed to **Pathology** provide the student with a fundamental knowledge of the causes, processes and manifestations of disease. The biochemical aspect of disease is emphasized and this is correlated with resultant histopathologic changes. In the first semester attention is devoted to the basic pathologic processes of disturbed metabolism of cells and tissues, degenerations, inflammation, progressive and regressive tissue changes and neoplasia. In the second semester a study is made of representative types of disease and of systemic pathology with special emphasis upon disease of oral and related structures. The material as presented during the first semester is prerequisite for progress during the second semester.

Oral The subject is divided into two courses and is **Pathology** taught in the junior and senior years.

Course I In the junior year, the phases of the subject studied are diseases of the pulp, root-canal therapy, and caries from a pathological viewpoint. Oral hygiene and diseases of the pericementum and other supporting structures of the teeth are also considered. Classroom and clinical instruction are carefully co-ordinated.

Course II In the senior year, non-surgical diseases of the jaws and soft structures of the mouth are considered, the symptoms for correct diagnosis are carefully noted and plans of treatment discussed. Practical cases for diagnosis and treatment planning are had in the School Infirmary and opportunity to observe the more serious diseases and their treatment is afforded the student during his term of hospital service.

ORAL MEDICINE

Dr. Ecuyer

Dr. Carvel

The etiology, underlying histopathology, and treatment of periodontal diseases are considered and correlated with the special clinical instruction in periodontia and endodontia.

ORAL DIAGNOSIS AND ROENTGENOLOGY

Dr. Donaldson

In the sophomore year the electro-dynamics of radiology and the technical procedures in dental radiology are presented by lectures, demonstrations and laboratory experience. In the junior year interpretation and correlation of radiographic findings are emphasized.

In the junior and senior years the student gains clinical diagnostic experience in making dental and oral examinations and correlating the clinical findings with the X-ray interpretations. In the treatment planning special consideration is given to the oral manifestations of functional and organic disease.

SURGERY

Dr. Houghton

Dr. Parker

Dr. Kim

Oral The object of this course is to give the student a **Surgery** practical knowledge of the application of the principles of surgery and surgical technique, and a familiarity with hospital and clinic procedures, in order that he may be better fitted to cooperate with the surgeon in consultation and more fully comprehend the complications which may arise.

Lectures are given in the senior year covering the surgical diseases of the jaws and soft tissues of the mouth with some explanation of the operative procedures. The senior students are regularly assigned to two weeks externship at Charity Hospital during the year and regularly observe operations performed by their teachers in the operating rooms of the hospital when the opportunity presents, as well as observation of the oral surgical cases in the hospital wards.

Exodontia This course consists of sixteen lectures on the principles of extracting teeth, including the proper selection and use of forceps, elevators and other instruments that aid in the extraction of teeth. Practical cases are handled by the instructor during the course.

The students extract teeth and do minor surgery in the large outpatient clinic at Charity Hospital under the guidance of their instructors. The students are also carefully trained by their instructors in the special exodontia clinic at the Dental School where they work on assigned patients.

Local Anesthesia This course consists of sixteen lectures on the pharmacology and equipment used in infiltration and block anesthesia and the landmarks and technique for injection. Practical instruction is given in the aseptic preparation of solutions and instruments.

GENERAL ANESTHESIA

Dr. Adriani and Staff

A lecture and demonstration course in the principles and technics of general anesthesia, emphasizing the use of nitrous-oxide-oxygen and other anesthetics in dental operations.

ORAL PEDIATRICS

Dr. Towill

This course consists of lectures, clinics and technic laboratory instruction which covers the technical aspects of treatment of children's teeth. Instruction is offered in the fundamentals and modification required in the preparation of all classes of cavities in the temporary teeth for the proper reception of different filling materials, emphasizing conservation of tooth structure. The proper manipulation and insertion of various metallic and plastic filling materials are carefully taught. The proper care of the first permanent molars is particularly emphasized. Various methods and procedures indicated in the restoration of broken and fractured central incisors in children are demonstrated. For the purpose of rational tooth conservation the technic of partial pulpotomy is taught, together with its indications and contraindications. The problem of the premature loss of deciduous teeth which necessitates proper space maintenance is carefully considered. Methods of constructing various types of space retainers in the treatment of such spaces are demonstrated. Prophylaxis and the use of sodium fluoride is emphasized as a factor in prevention. Emphasis is placed upon diagnosis and specific treatment planning.

A children's clinic, separate from the general operative clinics, equipped and supervised by a special pedodontic staff offers an opportunity for clinical demonstration of the practices stressed in the lecture course. The clinic for children's dentistry is conducted as a separate and independent department, however it works in close harmony with all other

departments and especially the departments of Operative Dentistry, Orthodontics and Public Health. Seminars are given at regular intervals throughout the third and fourth years.

During the third year, students are assigned to certain carefully selected classes in the Parochial schools of the city and are held responsible for the dental health education of those class-rooms, teachers, and parents for the remainder of the period they are in dental school. By this procedure the students become familiar with dental education principles and materials as provided by the Council of the American Dental Association and receive training in meeting the lay public in a constructive health program.

PUBLIC HEALTH DENTISTRY

Dr. Cook

This course is designed to provide the dental student with some insight into the philosophy, administrative organization and functions of public health. The elements of epidemiology, public health bacteriology and administrative practice are presented. Examples are used to orient the student in the application of these disciplines in the control of dental diseases.

ANATOMY

Dr. Rayer

Dr. Matukas

Gross This course consists of dissection supplemented by **Anatomy** quizzes, conferences and lectures. The aim of this course is to give the student an opportunity to gain a comprehensive knowledge of the structure of the entire body, with special emphasis on the anatomy of the head and neck region. The student is required to make a satisfactory dissection of one lateral half of the body.

MICROSCOPIC ANATOMY

Dr. Halperin

General This course embraces the combined study of **Histology** general embryology, histology, histogenesis and organogenesis. Lectures, recitations, laboratory exercises and special demonstrations illustrating histogenesis, organogenesis, as well as the study of normal adult tissues, will be included.

Dental The tissues of the teeth and oral cavity are studied **Histology** with greater minuteness, charts and models are made use of, and special slides are prepared for microscopical study and projection.

BACTERIOLOGY

Mr. Duggan

A comprehensive course in general microbiology to acquaint the student with the characteristics of bacteria, viruses and fungi associated with infectious diseases. The laboratory work is designed to provide the student with techniques commonly used and correlated with the lecture material so that experiments can be designed, analyses made and results interpreted to meet the requirements of the practicing dentist.

The course is designed to give to the student a working knowledge of the subject and to impress upon him the relation of mouth conditions to systemic disease.

PHYSIOLOGY

Mr. Duggan

A lecture and laboratory course, given in sophomore year. The lectures cover the whole field of general physiology, the functions, composition, and operations of the body structures. In the laboratory small mammals are used to demonstrate the physiological processes of respiration, circulation, and digestion.

PHARMACOLOGY

Dr. Ireland

Mr. Duggan

Course I A lecture and laboratory course in sophomore year dealing with the action of drugs on the animal system. Care is taken to teach and exemplify the action of those drugs which are chiefly used in the practice of dentistry.

Course II A lecture course, given in junior year, on the classification, description, and properties of drugs and medicines with which a dentist may have to deal. Special stress is laid upon the more important drugs used in dentistry, with a full discussion of their physiological effects and a study of the proper methods of administration. Prescription writing is explained in detail.

BIOCHEMISTRY

Dr. Guidry

A lecture and laboratory course, in freshman year, dealing with the chemical activity of the human body; the significance of osmotic pressure, colloids, hydrogen-ion concentration, buffer action, and oxidation-reduction in physiological

processes; the chemistry of fats, carbohydrates, and proteins and their fate in the human body; enzymatic reactions; the blood and other body fluids; hormones; nutrition; animal calorimetry; the vitamins; bone and teeth.

PRINCIPLES OF MEDICINE

Dr. Robinson

In this course, taught throughout senior year, the objective is to enable the student to acquire a general knowledge of the various diseases of the heart, lungs, and abdominal organs. The essential principles of medicine are dwelt upon, with special attention to diseases which may result from mouth infections. The general principles of physical diagnosis are studied and demonstrated in the classroom and hospital, and eight lectures are devoted to first aid.

DENTAL HISTORY AND ETHICS

Dr. Tiblier

This course, for seniors, treats of the intrinsic difference between moral good and moral evil; the rights of the dentist; his duties to himself; his relationship to his patient; his responsibilities to society and his obligations to his profession. Lectures cover the development of Dentistry and its advancement to its present health importance and professional standing.

JURISPRUDENCE

Mr. Murphy

These lectures, for seniors, cover the laws and regulations pertaining to the practice of dentistry, with all the legal relationships of dentist and patient, their rights and liabilities.

DEGREES CONFERRED

May 28, 1958

Valentino Acosta	Jerry Cecil Johnston
William Aguiló Dies, B.S.	Richard Paul Lesneksi, B.S.
Carroll Leonard Ancelet, B.S.	Robert Ashton Lefevé
